Canon News

IT
June 2005

Welcome to the June Newsletter.

DHL NZ LIONS SERIES 2005

The biggest and most exciting sporting event of the year is finally upon us, and Canon is proud to be a part of the action as the Official Referee Sponsor. With the arrival of the Lions and the thousands of British supporters coming to cheer on their team, the stage is set for an eventful couple of weeks. Be sure to keep an eye open during the provincial games for our ground signage and branding on the Referees' uniforms.

NEW PRODUCTS

EOS 350D w/18-55II Kit (Black)
EOS 350D Body (Black)

RRP \$1849
RRP \$1649

Striking quality, inspired design.

Great pictures made easy for developing photographers.

- 8.0 Megapixel CMOS sensor and DiG!C II for striking, professional quality photographs

Integrated Partners

Hands - on

TSA is delighted to have selectively appointed those companies which have chosen to partner with us, based on their ability to add the 'hands - on' approach with their own labs, proven track record in this industry and a clear vision that this is the direction for learning in the future. We believe this gives 100% satisfaction to most companies, and leaves no-one behind in the learning cycle, bringing the classroom to the organization or alternatively, being able to utilize our partners' learning labs.

This blended approach incorporates all facets of learning, which allows the various areas to be utilized where best needed, to suit the particular individual's learning styles within the organization. This brings about ultimate satisfaction, increased productivity, increased knowledge and lower training costs.

Business

We believe our interactive e-training products will provide the majority of customers with the training they need. For those who wish to supplement this with classroom based training or even completely outsourced training, we have formed partnerships with some of Australasia's top training companies to provide a total training solution.

Following our successes in Australasia, our goal is to expand this new and exciting concept into 42 different countries, taking industry training to a new level.

Performance

In an increasingly complex and more technology based world, the value and importance of learning cannot be

underestimated. Unfortunately, the cost of providing this learning is also increasing. In the future, the ability to provide this learning to as many students as possible, at the lowest cost, will be critical. Research has shown that interactive training not only produces better results, faster than any other, but is also more cost-effective and more convenient.

Experiences

Success in the e-learning industry has been brought about by a number of new technologies, including advances in video compression, Macromedia Flash and video streaming. This has enabled e-learning systems to include video based, tutor-led classes and complex visuals, without compromising bandwidth. Now the student can take advantage of web based, interactive, multimedia distance learning, even over a simple dial-up link. Many hundreds of students can train simultaneously from a single ThinkTank server, without interfering with other network traffic.

Vertical Markets

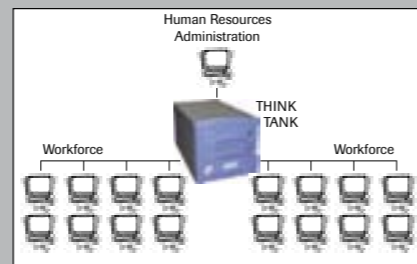

Our product range is designed to appeal to everyone, from the single user requiring simple CD based training, to the large corporate requiring an LMS and training solution for use with thousands of people. Our typical customer base is as follows:

- Government
- Polytechnics / TAFE
- Universities
- High Schools
- Councils
- Hospitals
- Insurance Companies
- Power Generators
- Banks
- Church Organizations
- Small/Medium Businesses

Accutrac

Easy Administration

ThinkTank™ includes an advanced learning management system called Accutrac™. Accutrac™ makes the merging of content and training simple and fast. It includes over 50 preset reporting features, allowing administrators to manage the entire learning process. UNEQUALLED in the training industry, Accutrac™ gathers and presents the information needed to manage from one to virtually unlimited students, with ease, all at the same time.

ThinkTank™ is a networkable management system that functions as an administrative tool for learning, delivery and tracking of all of your employees.

Affordable Unlimited Licence, updated regularly, measurable and scalable.

Cost Effective

Save time and money

Our computer-based and E-learning solutions have identified and solved the training needs of thousands of individuals, corporations, government agencies and various academic sectors. Our corporate enterprise training solutions allow your employees to train anywhere, anytime! Our training delivers expert-on-demand training, with skill assessment, simulations, final exams as well as tracking and reporting capabilities. Take the Specialized Solutions training challenge and preview one of our technical IT, Safety, Developer or Business Skills courses now.

Our E-learning curriculum is specifically designed with the busy professional in mind. Now you can get the training you need to get certified and launch your new career in the IT industry, or enhance your existing career by advancing your knowledge. Our software will allow you to get the training you need to better your life - from the comfort of your home - without leaving the security of your current job, until you are ready.

All of our programs are produced using advanced learning concepts that encompass learning techniques that are designed for adult learning. E-learning is very popular today for a very good reason - IT WORKS! People everywhere are discovering that they can fulfil their learning objectives conveniently (at their own pace, on their own time) and affordably (online classes start at a fraction of the cost of traditional classroom training).

Our easy-to-use delivery format allows you to concentrate on the lesson at hand, and not on how to use the delivery software - saving you time and frustration. Our comprehensive course materials are delivered in an easy to understand format - allowing you to get the most out of your time online. The courses incorporate audio, video and text training, and then the total experience is reinforced with exercises and practice tests to ensure that you have really grasped the material.

Knowledge is Power - Become Certified - Internationally Recognised Credentials

A+ Certification
CompTIA A+ Certification certifies the competency of computer hardware technicians working in the IT industry. In today's computer industry, computer repair technicians are presented with equipment from multiple vendors, using competing hardware and software standards. The A+ certification demonstrates the ability to assemble, install, configure, upgrade, troubleshoot, perform preventative maintenance, and repair personal computer compatible hardware and PC operating systems. A+ certified professionals are in high demand throughout the IT industry.

Network+ Certification
The CompTIA Network+ certification validates technical competency in networking administration and support. Those holding the CompTIA Network+ certification, demonstrate critical knowledge of media and topologies, protocols and standards, network implementation and network support. This certification is geared toward those with nine months field experience in network administration and support.

MOS - Microsoft Office Specialist
The MOS Certification (formerly MGLS) certifies individuals in the workplace with Proficient and Expert skills in the entire Microsoft Office Suite. Our expert staff of curriculum developers have created a 13 CD-ROM course for Microsoft Office that will elevate your expertise and prepare you for the Microsoft Office Specialist Exam.

MCSE - Microsoft Certified Systems Engineer
The MCSE Windows Server 2003 training course will prepare IT professionals to analyse business requirements and design and implement the infrastructure for business solutions. When IT students complete our MCSE Server 2003 training course, they will possess the skills and knowledge required to pass the certification exam and successfully lead organizations as they design, implement, troubleshoot, and administer the most advanced Windows operating system, Microsoft Windows 2003 Server.

Reviews, Awards, Testimonials

I have been a professional user of CAD programs for over 20 years, and DesignCAD continues to give me the simplest, most efficient way to create my 3D CAD models." - Miloslav Straka, President New World Graphics, New York.

As a new CAD software user, I had tried other CAD programs that were much too complicated for me. But, when I heard that DesignCAD Version 15 comes with free e-mail technical support, I figured this was a great way to get started. After installing the software, I was amazed at how easy it was to design things, make changes and print my ideas. I was able to design a mock up of a room addition in less than 30 minutes." - Charlene Lenk.

TARGET 1:
Sela Lott
A top performer for Komica Minolta, Ms Lott is considered armed and dangerous.
Must be eliminated immediately

TARGET 2:
Mike Ompettor
Hiding behind his mild mannered exterior, Mike is underhanded and part of the "Zorro" gang. Could be useful on our side.
NEUTRALISE HIM!

TARGET 3:
Max Front
The 'ladies-man' or Rich he uses his charm and manly looks to get behind enemy lines.
SHOOT HIM DOWN!
